

FUJITSU

THE POSSIBILITIES ARE INFINITE

Coral FlexiCall

The flexible way to keep in touch

Businesses today are tied directly to their communications operation...the more flexible the communications system, the more efficient the business.

FlexiCall is designed to enhance the Coral FlexiCom PABX system. The FlexiCall software enables the operator to utilise additional phone extensions through their own office extension. The additional extension can be another internal extension, a mobile phone or even an external line, such as a home telephone.

The freedom of movement FlexiCall affords the operator is immeasurable. No longer will those important incoming calls be missed, just because the desk was unattended, FlexiCall rings your normal extension and another external number, say your mobile or home number simultaneously. When the call is answered it can then be transferred, from your mobile to another number, or back to an office extension.

The Coral FlexiCall feature is a fantastic communications asset for those who work from a home-office, are out of the office or away from their workstation a great deal, or for those who just must stay in communication.

The Coral FlexiCall main features :

- lets you transfer calls back to an internal extension
- extends your accessibility "world wide"
- rings on both nominated lines simultaneously
- allows seamless communication continuity
- "Call forward busy", "Call forward all" and "Do not disturb" modes will override this feature

Note:

- Feature applicable to analogue and digital ports
- Requires disconnect supervision lines
- If this feature is used extensively DTMF receivers and trunks should be added
- Conference card/circuits are required

About Fujitsu

Fujitsu is a global leader in information and communications technology solutions. Throughout Australia and New Zealand, Fujitsu is recognised as a leading systems integrator and services provider. We deliver complex infrastructure systems and services, and business and telecommunications solutions, as well as offering access to a wide network of partners.
